Hazardous Weather

Low Rain Chances Again Today

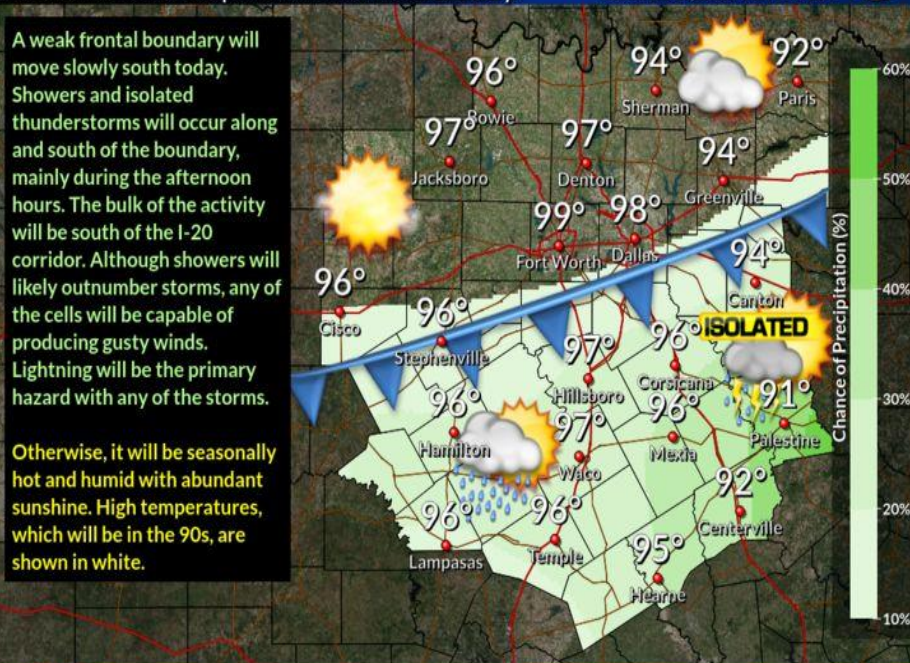

Showers and storms are expected south of a frontal boundary.

Weather Forecast Office
Fort Worth, TX
Issued Jul 30, 2019 5:24 AM CDT

A weak frontal boundary will move slowly south today. Showers and isolated thunderstorms will occur along and south of the boundary, mainly during the afternoon hours. The bulk of the activity will be south of the I-20 corridor. Although showers will likely outnumber storms, any of the cells will be capable of producing gusty winds. Lightning will be the primary hazard with any of the storms.

Otherwise, it will be seasonally hot and humid with abundant sunshine. High temperatures, which will be in the 90s, are shown in white.

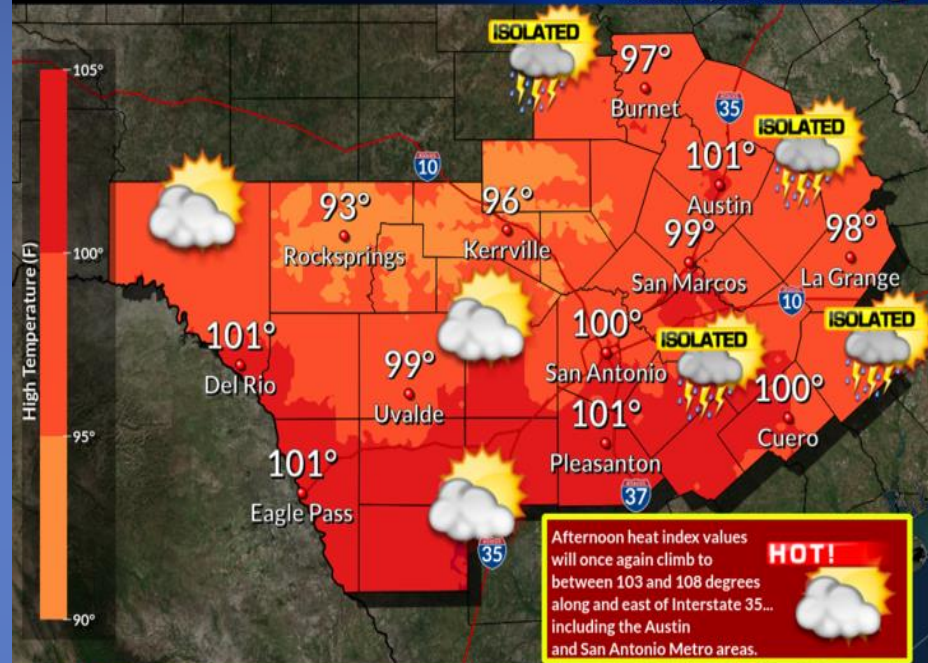

f t v NWSFort Worth

weather.gov/fortworth

A weak frontal boundary will move slowly south today. Showers and isolated thunderstorms will occur along and south of the boundary, mainly during the afternoon hours. The bulk of the activity will be south of the I-20 corridor. Although showers will likely outnumber storms, any of the cells will be capable of producing gusty winds. Lightning will be the primary hazard with any of the storms. Otherwise, it will be seasonally hot and humid with abundant sunshine. High temperatures will range from the lower 90s in the cloudier areas with shower/storm activity to the upper 90s in the sunnier areas north of the front.

Tuesday: Hot with Isolated Storms

Weather Forecast Office
Austin/San Antonio, TX
Issued Jul 30, 2019 4:26 AM CDT

f t v NWSSanAntonio

weather.gov/ewx

Afternoon highs today will once again climb into the upper 90s to near 100 in several spots. With the plentiful moisture in place across South Central Texas this will cause afternoon heat index values to rise to between 103 and 108 degrees along and east of Interstate 35. A few isolated showers and storms will be possible across the northern Hill Country, parts of the I-35 corridor, and areas east of I-35. Any of these storms could produce lightning and gusty winds.

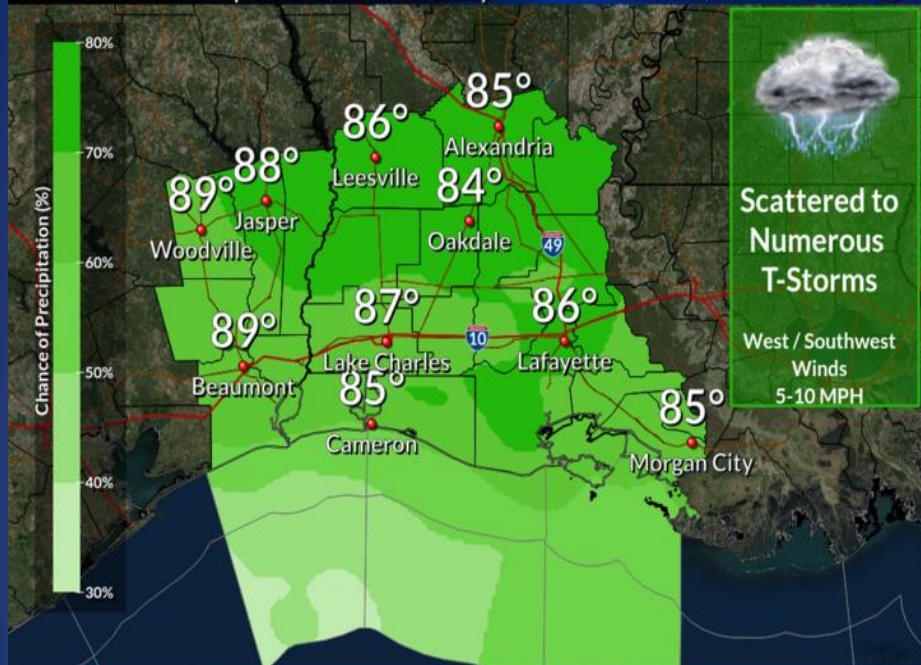

Hazardous Weather

Tuesday Highs and Rain Chances

Rain chances and max temps from 7 AM to 7 PM Tuesday

Weather Forecast Office
Lake Charles, LA

Issued Jul 30, 2019 5:55 AM CDT

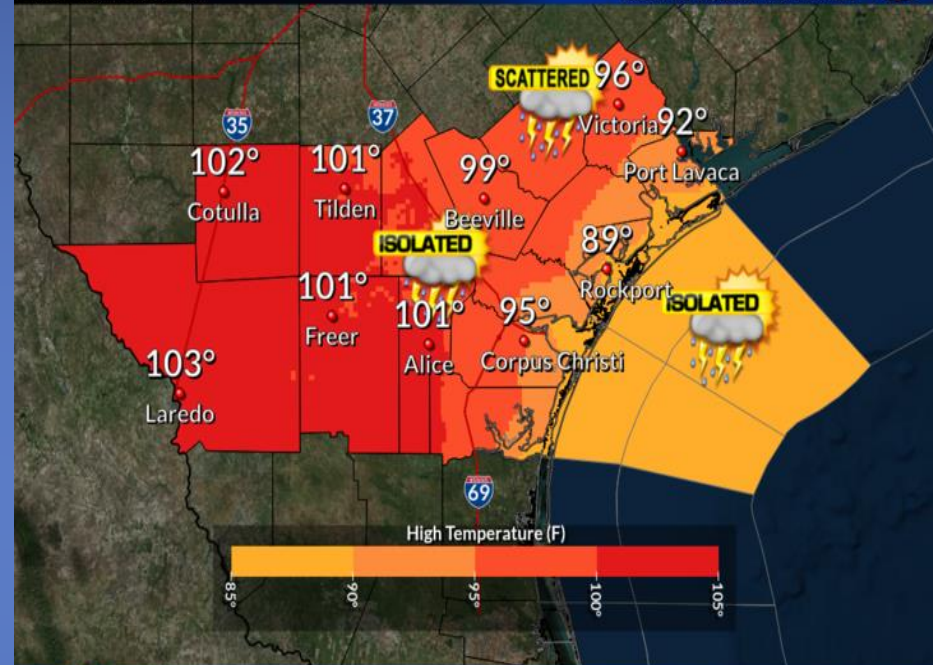

A slow moving upper level disturbance will drape itself across the area keeping scattered to numerous showers and thunderstorms in the forecast. Highs will be in the mid to upper 80s with west / southwest winds 5 to 10 mph.

Hot and Humid Today

Heat Index 105 to 109

Weather Forecast Office
Corpus Christi, TX

Issued Jul 30, 2019 4:00 AM CDT

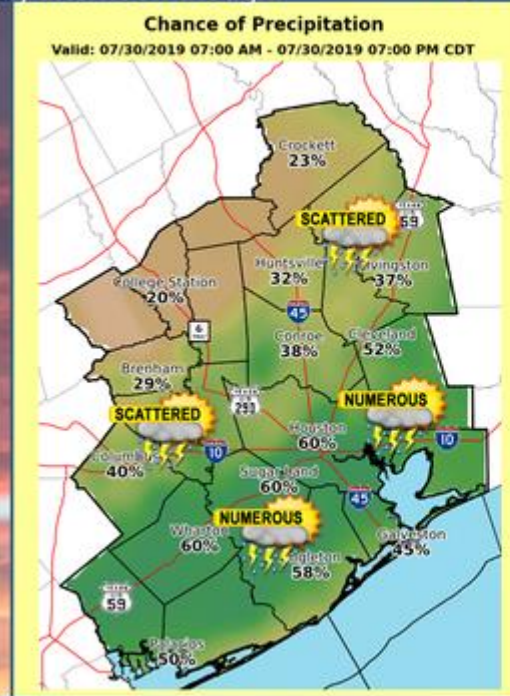

Scattered showers and thunderstorms will be possible today across the Victoria Crossroads with isolated storms possible across the Coastal Plains and Coastal Waters. Otherwise, expect hot and humid conditions. Heat indices will range from 105 to 109.

Hazardous Weather

Storms Developing Tuesday

Rain chances for the region 7 am to 7 pm...mainly afternoon though.

Weather Forecast Office
Houston/Galveston, TX
Issued July 29, 2019 8:12 PM CT

An upper level disturbance will drift southwest through the region on Tuesday bringing an increasing chance for rain to the area.

Plan for storms with

- Brief heavy rain
- Lightning
- Gusty winds

@NWSHouston

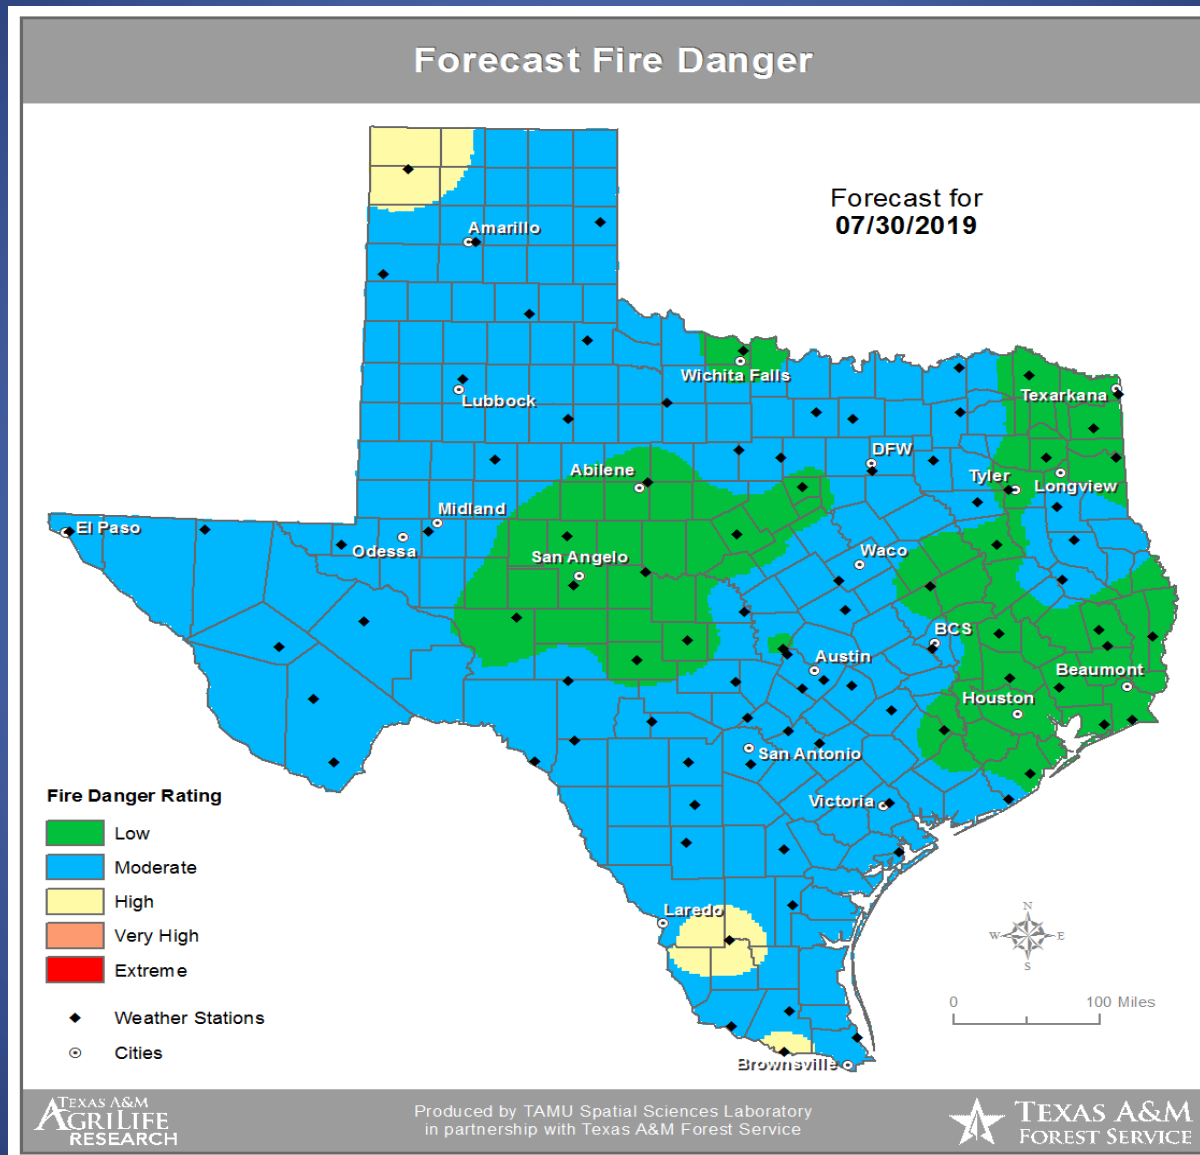

weather.gov/hgx

Scattered to numerous showers and thunderstorms moving through the region Tuesday, brief heavy rainfall and lightning the main threats.

Weather Warning/Advisories Issued
